4. Safety & Warnings 【Mandatory by Category】

Important Safety Information

Read all instructions before use. Failure to follow these instructions may result in damage to the product or personal injury.

- Warning: No welding or replacement of components in charged state
- Do not use this product for purposes other than its intended use.
- Inspect the product before each use; do not use if damaged.
- Follow installation and operation guidelines to avoid injury.
- Do not expose to water or moisture.
- Do not replace components with different parameters at will during maintenance
- The rated voltage, current and power of the replacement parts must be greater than or equal to the original components.

5. Instructions for Use 【Mandatory】

Examples:

1. Before First Use: Please check whether the parts are intact, and then test welding.
2. Ordinary patch components: soldering iron temperature 320~380 °C, soldering single pin duration ≤ 3 seconds;
3. Precision IC, LED, photosensitive devices: 300~350 °C, shorten the welding time, high temperature for a long time will burn the internal chip, damage the LED phosphor.
4. A small amount of flux, and the residual rosin after welding. The residual flux corrodes the pin for a long time, resulting in open circuit.

NOTE: Sellers shall add and adjust product-specific steps where necessary.
